

Hamburger Containerboard  
PRINZHORN GROUP

A cool brand  
**AustroTop**

**Kraft liner substitute**  
**Humidity-resistant**  
**Special sizing**  
**Recycled paper**

# AustroTop

Kraft liner substitute

Fruit and vegetable crates  
Refrigerated warehouse packaging

Our kraft liner substitute  
for the highest strength  
requirements and  
**TOP BCT performance**

## Quality

- Guarantees optimum running characteristics on the corrugator
- First-class machining as well as high surface quality

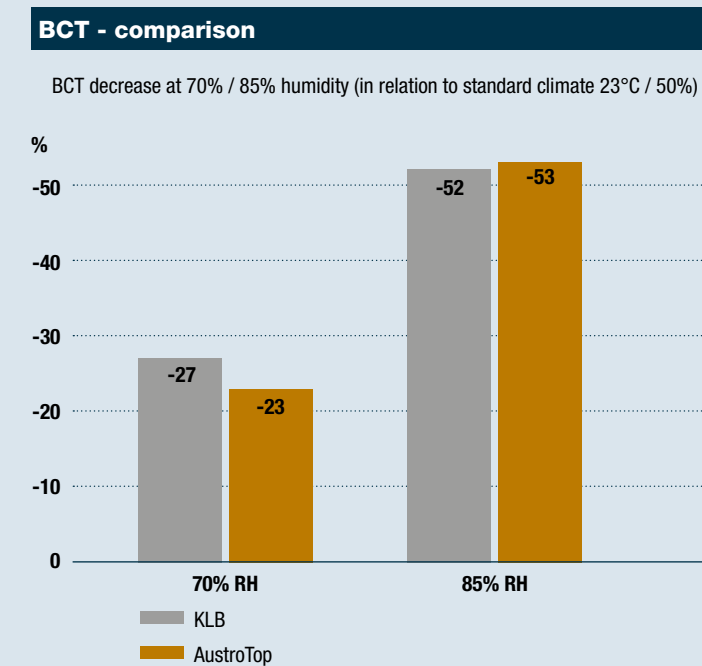

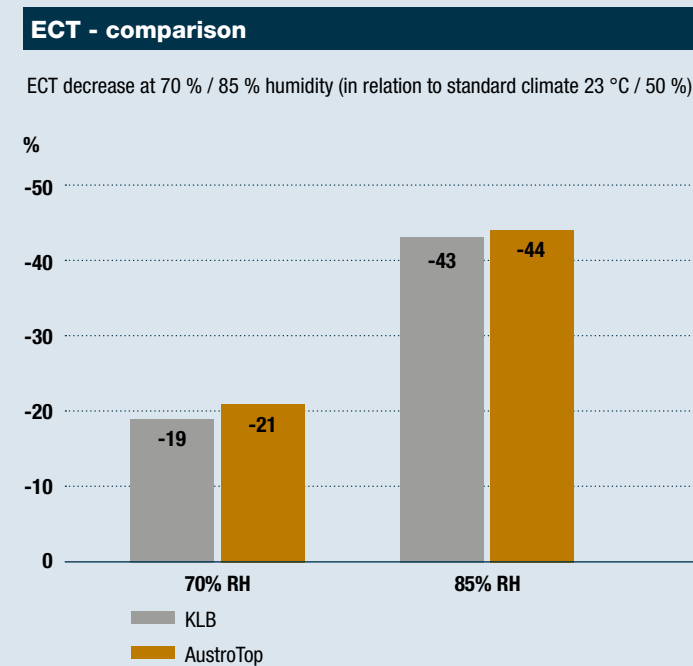

- Optimized fiber furnish input to improve strength characteristics and creasing ability
- Special sizing for humidity-resistance (Cobb 1800 specified)
- Comparable up to higher SCT values than standard commercially available kraft liner grades
- Excellent strength characteristics under changing climatic conditions
- Cost advantage compared with kraft liner

## Case Study

<b>Outer layer</b>	AustroTop or KLB (Europ. standard)	140 gsm
<b>Corrugation</b>	AustroWelle	100 gsm
<b>Inner layer</b>	AustroLiner 2	135 gsm
<b>Corrugation</b>	profile C	

The test results were determined by an external, accredited test laboratory. The results shown demonstrate the ECT and BCT performance of AustroTop compared with kraft liner in critical climatic conditions. Comparable ECT values show comparable BCT performance.
